

CORE HUB CRITICAL SPARES CASE

The CORE Hub critical spares case is a convenient way for installers or end users to stock all the major components of the range of Ciqurix CORE Control Hubs and Extension Hubs. It is designed to be located on site, or alternatively for engineers to carry as van stock.

Although the operational failure of Ciqurix systems is rare, BS5839-1:2017 section 47.2.j.2 requires that the system maintenance provider and system user maintain an appropriate stock level of spare parts on site. This case is a simple and straightforward way to fulfil this requirement and provide peace of mind that the system can be quickly repaired should it ever be required.

It contains a spare Ciqurix Controller, power supply module, power regulator, switch & router packs, and a media converter. If the case is to be kept on a site then the spare Controller can be programmed during commissioning to match the installed system, making it available for immediate swapover with no programming necessary. A reference card is included to facilitate replenishment of any parts used.

Specification

Contents:	1 x CQ-SM-03 Ciqurix Controller 1 x SG-PS-72 Main Power Supply Module 1 x XP-RG-12 Power Regulator 12V 1 x DK-RG-09 Power Regulator 9V 1 x CX-ZP-911 Media Converter 1 x CX-ZP-921 Switch/Router Stack (Control Hub) 1 x CX-ZP-916 Switch Stack (Extension Hub)
Weight:	13.2 kg
Dimensions:	582mm (h) x 298mm (w) x 255mm (d)
