

PoE SPLITTER

PS-112

An isolated PoE splitter which meets IEEE 802.3af and provides 12Vdc power for the FCamX range of cameras. It allows the FLEX FCam X range of cameras to be powered from a compatible PoE switch via the network data cable and avoids the need for a local power supply.

One PS-112 is required per camera. The network data cable feeding the camera must be connected to a PoE injector or PoE switch compliant with IEEE 802.3af.

Specification

Part code:	PS-112
Input Voltage:	38-56 Vdc (IEEE802.3af active)
Output Voltage:	12 Vdc 1A (13W max)
Isolation:	18kV
Transmission Rate:	10M / 100Mbps
Size:	80 x 25 x 28 mm
Weight:	58g
Temperature:	-10 - +50 °C
Humidity:	95%RH
Protection:	overheat, over-voltage, short-circuit
